PRODUCT INFORMATION:

Agri-Sol Zinc Plus+ is a 100% water-soluble formulation of primary and micronutrients for use in foliar applications. It is used to help prevent or correct certain nutrient deficiencies in selected row and nut crops.

USE SUGGESTIONS:

Foliar Application:

- In general, apply 5 pounds per acre on row crops, as determined by tissue analysis. Make 2nd application 10-14 days later, and use at least 10 to 20 gallons of water. For pecans, use 100 gallons water per acre. Add as first ingredient.
- **Pecans (bearing trees):** To prevent "rosetting" and increase carbohydrate metabolism use 5 lbs per acre applied in 2nd pre-pollination application. Make another 5 lb application in first cover spray.
- **Pecans (non-bearing trees):** 5 lbs per acre with each cover spray 4-6 weeks apart for a total of seven applications if needed.
- **Grain Crops:** For seed and grain formation, use 5 lbs per acre as determined by tissue analysis. Another 5 lb application 10-14 days later may be needed to correct deficiency.
