PRODUCT INFORMATION:

Agri Sol Boron Plus+ is a 100% water-soluble formulation of primary and micronutrients for use in foliar applications. It is used to help prevent or correct certain nutrient deficiencies in row crops.

USE SUGGESTIONS:

Foliar Application:

- In general, apply 5 pounds per acre on cotton, peanuts or soybeans per season. Make 2 applications of 2.5 pounds per acre and use at least 5 to 10 gallons of water per application.
- **Cotton:** To stimulate boll development and fiber strength use 2.5 lbs per acre applied at early bloom stage and another 2.5 lb application 10-14 days later.
- **Peanuts:** To prevent “hollow-heart” and increase fruiting and carbohydrate metabolism use 2.5 lbs per acre applied in 2nd fungicide application. Repeat application 10-14 days later.
- **Soybeans:** For increased seed formation and nitrogen fixation, make first 2.5 lb application within 6 weeks after planting and another 2.5 lb application 14 days later.
