## 24-0-0+B

### PRODUCT INFORMATION

Threshold 24-0-0+B is a liquid foliar formulation designed to supply supplemental nitrogen, potassium and boron to crops in a readily available, foliar spray. Triazone nitrogen remains on the leaf surface longer in the liquid phase than conventional urea-based products as well as greatly reducing the potential for burn. Ammonia volatilization is minimized and Threshold 24-0-0+B gives a more uniform nitrogen release pattern

*This material contains Boron and crops sensitive to this element may be injured.*

*If adding other fertilizers or chemicals, a jar test should be performed prior to tank mixing.*

### **GENERAL RECOMMENDATIONS**

**Apply in early morning or late afternoon. Do not apply when high temperature conditions exist. Add 24-0-0+B as the last ingredient as ½ of the water is being recirculated and prior to adding the balance of the water for the desired volume.**

**Corn:** Apply 1 gal/acre early season and repeat at early tassel or silk.

**Cotton:** Apply 1 gal/acre at first bloom and 1 gallons/acre 14-21 days later.

**Cucurbits:** Apply 1 gal/acre in a minimum of 25 gallons of water.

**Fruit and Vegetables:** Apply 1 gal/acre in a minimum of 100 gallons of water prior to fruit set.

**Grain:** Apply 1-1/2 gallons/acre at flag leaf.

**Soybeans:** Apply 2 gallons/acre at early bloom.

**Peanuts:** Apply 1 gallon at bloom and repeat 14 day later.

**Potatoes,:** Apply 2 gallons/acre midseason at tuber initiation or elongation.

**Threshold 24-0-0+B should be used to provide supplemental nitrogen. Petiole samples should be used to judge input needs. It should be used in accordance with the recommendation of a qualified crop consultant or as a part of your approved nutrient management plan.**
