GENERAL INFORMATION

In order to improve crop performance, **Foliar Complete** is used as a supplement to fertilizer programs by incorporating important micronutrients at or when the plant needs them the most.

Foliar Complete is designed for use on small grains, cotton, corn, soybeans, and peanuts but can be used on most crops and in numerous types of applications such as irrigation, soil and foliar applications either with or without other fertilizers.

DIRECTIONS FOR USE

Foliar Complete will disperse in water with minimal agitation. It can be tank mixed with most pesticides including 2,4-D and Glyphosate. Always make a small-scale test to assure compatibility.

Most liquid fertilizers (X-0-X) will mix easily with **Foliar Complete** at normal fertilizer rates. Ammonium phosphate fertilizers have a tendency to be more compatible than orthophosphate based materials. When combining **Foliar Complete** with phosphate fertilizers (X-X-X) maintain vigorous agitation to ensure good product mixing.

RECOMMENDED RATES

Soil Applications: In-furrow applications should be made at the rate of 1.5-2 quarts per acre at the time of planting. Broadcast soil applications should be made prior to planting at 2-4 quarts per acre. Banded and side dress applications should be made at the rate of 2-4 quarts per acre and for best results should be followed by cultivation, irrigation or rainfall to improve placement into the root zone.

Drip irrigation: Use 1.5-2 quarts per acre to establish plants initially and then several times throughout the growing season. Use caution to avoid backflow into water supply.

Foliar Applications: Use 1.5-2 quarts per acre in a minimum of 5 gallons of water per acre by air and no less than 8 gallons by ground.

WHAT TO DO IN CASE OF CONTACT

If Ingested: Give large amounts of water or milk, if conscious. Contact a physician immediately.

Eye Contact: Flush eyes with clean water for 15 minutes. Seek medical attention immediately.

Skin Contact: Remove contaminated clothing and wash skin with soap and water. Seek medical attention if irritation develops or persists.

If Inhaled: Move to fresh air and seek medical attention if irritation develops or persists.
