GENERAL INFORMATION

LINK™ Manganese is specifically formulated to achieve compatibility with Glyphosate and other selective and non-selective herbicides commonly tank mixed with ammonium sulfate or other fertilizer salts. A proprietary blend of compatibility and chelating agents preserves the efficacy of the herbicides while maintaining the availability of the manganese.

LINK™ Manganese is recommended for foliar application on peanuts, cotton and soybeans. It is recommended for use throughout the season in a program of multiple applications. This provides a continuous supply of vital nutrients at or near the time they are needed for maximum yields of high quality crops.

DIRECTIONS FOR USE

LINK™ is compatible with most liquid fertilizers and pesticides. A jar test is always recommended. Order of addition: **1.**Water, **2.** Ammonium sulfate (17 lbs. per 100 gallon of water) **3.** LINK™ **4.** Glyphosate or other selective and non-selective herbicide. Use 10–20 gallons of water per acre in conventional sprayers. Aerial: 3-5 gallons water per acre.

APPLICATION RATE

Apply at the rate of 1-2 quarts per acre. Repeat every 2-4 weeks or as needed in a herbicide or fertility program.
