

THRESHOLD™

MnZ

Product Information

Threshold MnZ is a liquid foliar formulation designed to correct and prevent deficiencies in vegetable crops. If added to the spray tank first, **Threshold MnZ** will aid in lowering the water pH. A jar- test to check the compatibilities of new or unfamiliar chemical combinations should be performed prior to mixing and application. The addition of a non-ionic surfactant and /or urea nitrogen will aid in uptake.

Directions For Use

Threshold MnZ should be applied at weekly intervals starting with the first spray at 1 to 2 quarts per application in enough water to cover. Aerial application: 1 quart per acre in 5 to 15 gallons of water.

Crop Recommendations

Vegetable Crops: Beans, cabbage, cantaloupe, celery, cucumber, eggplant, endive, lettuce, greens, peas, melons, pepper, potatoes, squash, strawberries, sweet corn and tomatoes. Apply 1 to 2 quarts per acre in weekly applications up to first harvest.

Turf: Apply 2-4 oz. per 1000 sq.ft. in enough water to cover. Repeat at regular intervals.
